

SAMEENA GILL, PE, MBA

Technical Project Manager | Mission-Critical Infrastructure | Facility Construction | Owner's Representative
Bakersfield, CA | 424-603-7040 | sameenagill12@gmail.com | linkedin.com/in/sameena-gill

PROFESSIONAL SUMMARY

Technical Project Manager and California-licensed Professional Civil Engineer (PE) with a decade of experience leading capital construction and infrastructure projects within mission-critical, uninterruptible facilities — including wastewater treatment plants, water infrastructure, and commercial builds where downtime was not an option. Direct experience with the mechanical, electrical, and backup-power systems that keep critical facilities operational: HVAC/cooling system rehabilitation, standby generators, and solar power generation. Skilled Owner's Representative managing multidisciplinary architect/engineer/contractor teams, MEP coordination, procurement, commissioning, and Procore-based project controls across annual capital programs exceeding \$25M. MBA in Project Management, M.S. in Civil Engineering, and Lean Six Sigma certified.

CORE COMPETENCIES

Capital Construction • Mission-Critical / Fit-Out Construction • Owner's Representative • Construction Project Management • Capital Improvement Programs • Construction Scheduling & Critical Path Management • Pull Planning & Look-Ahead Planning • Project Controls • Budget & Cost Control • Risk Management / Regulatory Compliance • California Building Code (CBC) • OSHA Safety Standards • Contractor Management • Equipment Procurement • Contract Administration • MEP Coordination • HVAC & Cooling Systems • Backup Power / Generators • Renewable Energy (Solar) • RFIs • Submittals • Shop Drawing Review • Commissioning • Site Logistics • Utility Coordination • Change Orders • QA/QC • Executive & Board-Level Reporting • Cross-Functional Leadership • Lean Six Sigma • Procore
Tools: Procore Construction Management • Microsoft Project • Microsoft Office Suite • AutoCAD • Bluebeam / PDF Review Tools

PROFESSIONAL EXPERIENCE

Construction Project Manager | Owner's Representative

Reliable Tire Depot | July 2025 – Present

Lead owner's representative for a new commercial warehouse and operations facility — combining new construction and fit-out of an existing building — from site selection through commissioning and operational turnover.

- Managed construction of a 35,000+ SF commercial warehouse facility on a 5+ acre site valued at ~\$10M, encompassing both new building construction and interior fit-out of an existing structure, including office space, truck parking yard, repair shop, and operational support areas
- Coordinated 20+ contractors, consultants, and stakeholders across architectural, civil, structural, mechanical, electrical, plumbing, and specialty disciplines for both new-build and fit-out scopes
- Led MEP coordination activities ensuring successful integration of building systems, equipment requirements, and operational functions
- Managed long-lead equipment procurement, vendor evaluations, and installation planning to minimize schedule risks
- Improved construction sequencing and milestone tracking, reducing project schedule duration by 15%
- Negotiated contractor changes and change orders resulting in cost savings; delivered all project activities with zero recordable safety incidents
- Reviewed 100+ RFIs, submittals, and shop drawings; managed inspections, punch lists, commissioning, and project closeout using Procore

Senior Engineer | Capital Projects Manager

Westside Water Authority | August 2024 – July 2025

Provided technical and project leadership for mission-critical water infrastructure improvements while supporting executive leadership, capital planning, and organizational process improvement.

- Managed a \$3M critical pipeline inspection and rehabilitation project supporting agricultural water transmission infrastructure
- Maintained uninterrupted water delivery during rehabilitation by implementing temporary bypass strategies and scheduling construction during low-demand operational periods
- Supported executive leadership with capital planning, budget development, contractor management, and strategic project decisions
- Managed project schedules, budgets, procurement activities, invoices, contracts, and change order evaluations; coordinated design reviews, technical decisions, and field execution
- Led equipment evaluations and procurement decisions for infrastructure reliability improvements; improved agreement approval workflows by implementing standardized procedures

Civil Engineer III | Capital Construction PM, Water

City of Bakersfield | February 2023 – August 2024

Directed multiple concurrent capital construction projects supporting municipal water infrastructure, treatment systems, and long-term reliability improvements.

- Managed an annual capital improvement program exceeding \$25M, overseeing multiple concurrent water infrastructure projects from planning through construction completion
- Delivered 5+ concurrent construction projects within active operating facilities requiring detailed sequencing and coordination to maintain continuous operations
- Managed a WaterSmart advanced metering project installing new meters across residential sites to reduce water loss; served as PM for a well rehabilitation project powered by an on-site solar array
- Managed critical path activities, milestone tracking, risk identification, and project controls across contractors, consultants, operations teams, and stakeholders
- Coordinated engineers, consultants, contractors, vendors, regulatory agencies, and executive leadership; managed contractor performance, inspections, change orders, invoices, and project financial tracking
- Presented project status updates, budget summaries, and technical recommendations to City Council, board members, and executive leadership; ensured compliance with CBC and OSHA safety standards

Engineer III | Capital Construction PM, Wastewater

City of Bakersfield | September 2019 – February 2023

Managed complex wastewater treatment infrastructure modernization projects within an active operating facility where uninterrupted service was essential.

- Managed multimillion-dollar rehabilitation of a 32 MGD activated sludge wastewater treatment plant, including booster/blower building upgrade with new HVAC/cooling systems and backup generators, from planning through commissioning and closeout
- Delivered construction while maintaining continuous treatment operations and zero facility shutdowns; implemented phased construction strategies to reduce operational risk and maintain treatment capacity
- Achieved cost savings through constructability reviews, contractor coordination, and proactive change management
- Coordinated contractors, consultants, plant operations teams, maintenance personnel, and regulatory agencies; supervised four technical staff supporting engineering and regulatory programs
- Presented project status, budget, and risk updates to City Council, board members, and executive leadership; maintained compliance with California Building Code (CBC) and OSHA safety standards

Engineer I / II | Project Engineer, Wastewater Infrastructure

City of Bakersfield | January 2017 – September 2019

- Supported planning, design, and construction delivery of wastewater capital improvement projects; assisted project managers with construction administration, plan reviews, cost estimates, and inspections
- Reviewed construction plans, specifications, drawings, and technical submittals; prepared engineering reports, regulatory documents, and groundwater monitoring/compliance documentation
- Supported wastewater treatment operations, biosolids management programs, and facility improvement initiatives

Staff Engineer

Brown and Caldwell | November 2016 – December 2016

- Performed reinforced concrete structure analysis and engineering calculations supporting infrastructure projects; assisted senior engineers with technical evaluations and documentation

Engineering Intern

Punjab Water Supply and Sewerage Board | January 2014 – June 2014

- Supported field engineering activities, construction inspections, and quality assurance for water infrastructure projects; assisted engineering teams with construction documentation and site coordination

EDUCATION & LICENSE

- Master of Business Administration (MBA), Project Management — 2024
- Master of Science (M.S.), Civil Engineering — 2016
- Bachelor of Science (B.S.), Civil Engineering — 2015
- California Professional Civil Engineer (PE)
- Lean Six Sigma Certification
- OSHA Safety Standards Training
